Thanks again for participating in our recent Legal Subteam call. It was helpful to hear and understand how your companies have addressed past conflict of interest issues. At this point, we can begin working with you, as discussed on our call, on a written document memorializing how your companies will ensure that conflicts do not arise through your participation in the contemplated joint RFP process. From our collective discussion, it appears that NU may have a base document from which to work as a result of the CT procurement. To the extent one document can be created to apply to all EDCs who participate, that would seem to be the most efficient way forward, but we understand the potential need for company-specific language in some cases. Any thoughts you have on proceeding are welcome, and I will follow-up with you on how to best coordinate with the Legal Subteam who are copied here. This document needs to be in place before the Transmission Procurement Subteam can invite EDC representatives to join future meetings.

Best,

Jason
