Subject: Consultant

I would like to resolve the consultant issue this week if possible so we can get someone going on the work. Unfortunately, I think that B&V is no longer a viable candidate, in part because they are likely to have additional work to do for NESCOE, and in part because (according to a very reliable source) they did not do a first rate job on some of the work already done for NESCOE. That leaves the choice between Concentric and Sussex, with the latter presenting a significantly lower cost estimate. I'm happy to resolve this among us with a meeting, phone call or email: let me know your preferences. Thanks.
