Subject: Draft

Tony:

I hope you got through the storm OK. Nasty stuff to our south.

I've attached my most recent shot at a draft of the legislation we have been discussing; you may want to plug in the material you are putting together, or just send it separately and let me try to meld them. (Note my "clever" title to the Act.) Interesting news from Spectra, by the way: they say they are almost fully subscribed 450 BCF additional capacity (the AIM project) into NE, and say they expect to have it in service in 2016.

Subject: Draft legislation and reminder

I have attached two draft LDs for comment and discussion. They overlap; one creates the Maine Power Authority with powers to execute contracts for both gas pipeline capacity and electric capacity and energy, the other give the PUC the authority to order T&Ds and LDCs to buy gas pipeline capacity.

So I can schedule the next meeting, please let me know your availability for October 5, 10, 11, 16, and 18 (for a meeting that would begin at 9 and run to noon). If none of those dates work, please let me know your availability for the last couple weeks in October.

Thanks.

Tom Welch
