---

Bob,

I would be very pleased to find a time to talk. I am eager to understand NH's concerns -- and for NH to understand why the other New England states believe that new electric transmission (and new gas pipeline capacity) is so important and so urgent. I also want to be sure that all those who are involved in the decision process in NH understand that the gameplan centers on advancing a broad-based energy infrastructure package with the clear understanding that not every state will benefit from every element of the package. But we all will benefit from the package as a whole -- and will agree to share costs on individual elements based on the overarching benefit that it offers.

Would it make sense to try to connect just ahead of the start of the meeting on Wednesday at 1pm? Or at the end of the afternoon -- perhaps around 5:30pm? Carmen in my office stands ready to confirm a time.

Yours,

Dan

Dan,

I plan to attend to meetings next week. I was hoping that we could get a couple of minutes together so I could share some of New Hampshire's concerns regarding the socialization of transmission costs.

Regards,

Bob
