Subject: Clean Energy Future - question for Managers

Confidential Draft

Request: response re: question on public release. Please let me know if you would like to discuss as a group.

Recall that we asked Black & Veatch to run a "Clean Energy Future" as a contract amendment to the Gas-Electric Study. The Clean Energy Future is attached. As discussed, it is presented outside of the Gas-Electric Report to maintain the four corners of that analysis as initially scoped.

I am sending this to Managers only (and to David Cash in Ann Berwick's absence). ***A question before I send to the broader state list is whether you prefer the Clean Energy Future to be for your/state information or for it to be publicly released at some point in September?*** This future was not identified in the initial scope. There is no stakeholder expectation about it. I'd like your collective judgment on its treatment to inform the broader state group. The Clean Energy Future is as you might expect costly. There is the potential for various interests to use/misuse the results.
